

Things you should know about SKYDIVE AUSTRALIA

BEST AIRCRAFT

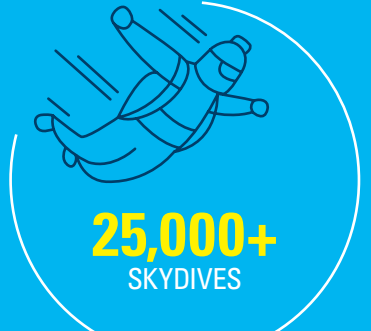

WE HAVE THE **LARGEST FLEET OF AIRCRAFT** OF ANY SKYDIVING COMPANY IN AUSTRALIA

The majority of our planes are Cessna Turbo Prop Grand Caravans which means they fly faster, they fit up to 10 of your pals AND they are more comfy.

WE USE THE LATEST DESIGNED MICRO-SIGMA CONTAINERS AND STUDENT HARNESSES

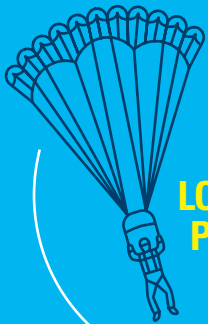

This means they are the safest, the most sophisticated and the most comfortable harnesses that money can buy!

25,000+
SKYDIVES

We boast some of the
**most experienced Tandem
Masters in the world.**

Some of our crew have over 25,000 skydives under their belts and lots are world-class skydiving athletes competing at international levels.

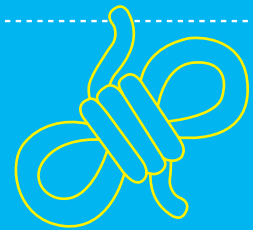

DURABLE & LONG-LASTING PARACHUTES

Our canopies (or parachutes) are sourced from the leading manufacturer and provide total serenity in flight without losing the feeling of freedom.

We use a
sophisticated
photo and
video system...

...which captures your entire skydive
adventure and allows you to see it
all again within minutes of landing!

Our Parachute Lines (or, the things that hold the parachute on to your Tandem Instructor's harness) are some of the

TOUGHEST IN THE WORLD

and are made to withstand the harsh Australian conditions.

OUR RIGS ARE FITTED WITH **AUTOMATIC ACTIVATION DEVICES**

which means your reserve canopy will automatically be deployed should your main canopy not open for any reason (ps. this is super rare).
